Sanmu (Zhejiang Mingzhen Electric & Electronic Co., Ltd), announce exclusive Distribution (License) Agreement for Australia and New Zealand market with Dynamic Industrial Systems *

Sanmu (Zhejiang Mingzhen Electric & Electronic Co., Ltd), a world-class manufacturer of AC and EC electric motors and fans for the HVAC&R global markets, are excited to announce an exclusive Distribution (License) Agreement for the Australia and New Zealand region with Dynamic Industrial Systems, a leader in innovative industrial solutions. This alliance is set to expand the presence, expertise and customer experience for all current and future Sanmu customers.

Sanmu is a high-tech enterprise located in Wenling City, Zhejiang Province, established in 1996. The company is based on advanced production equipment and technology, focusing on the research and development, production, and sales of AC/EC high-efficiency energy-saving external rotor fans.

The company specializes in producing a series of products such as axial flow fans, forward curved single/double inlet centrifugal fans, and backward curved centrifugal fans, which are characterized by high efficiency, energy conservation, and environmental protection. They are widely used in the HVAC industry, data centers, negative pressure wards, energy storage industry, cold chain, new energy and other fields.

With advanced production processes and strict quality control systems, Sanmu company's products have successively passed CCC, CE, and ROHS certifications, providing reliable product guarantees for global customers, comprehensively deepening strategic cooperation, and working together to achieve mutual benefit and win-win results.

Oliver Xin, Sanmu, Sales Director says “we are excited to partner with Dynamic Industrial Systems as our exclusive and sole distributor to sell our products in the Australia and New Zealand markets. We recognize Dynamic Industrial Systems strong market presence and extensive knowledge of the Australia and New Zealand markets. We are confident that their expertise and commitment perfectly aligns with our vision to expand our brand and product reach in the region”.

Peter Gibson, Founder and CEO of Dynamic Industrial Systems, expressed enthusiasm about the partnership, stating, “This collaboration will bring to the Australian market an exciting company with

grand ambition that is heavily invested into providing highest quality solutions, best in class customer service and experience, and of course outstanding lead-time, delivery and quality.

I have been around external rotor motors and EC fans market across my whole career. I was fortunate to be part of the global market launch of EC external rotor motor technology early in my career in the early 2000's with some of the sharpest minds and leaders in the industry. We see now a new era of development and leadership with EC systems is upon us. With Sanmu we see nothing but opportunity to deliver on the world's aggressive net zero and sustainability goals. We anticipate that our new partnership will deliver a new energy to the market and will deliver substantial value to our customers businesses'.
